Raising attainment standards in curriculum and qualification work:

Benefits of using MAPS:

For Head Teachers & HODs

- **Reporting tools** to analyse student, class and school performance data
- Work and mark data can be **transferred between schools** – aiding transition issues
- Provides a **central management system** for Diploma work – accessible at other schools/colleges
- Moderation portfolios enable **standardisation of teacher marking** – improving consistency
- Develop **parental involvement** via the new secure Parent News Feed service

For Teachers

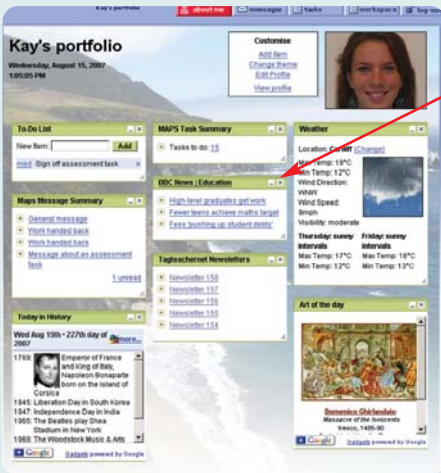

- Centralised online **management of assessment** of students' work
- **Assign tasks online**, by individual, groups or whole classes
- Access students' work online for **annotating, marking, assessment** and **standardisation**
- Assessment tasks include embedded **curriculum links** and qualification **mark schemes**
- **Import your own learning resources** from other learning content systems
- Supports **Assessment for Learning**
- **Save time and hassle** by submitting qualification coursework and marks directly to the exam board

For Students

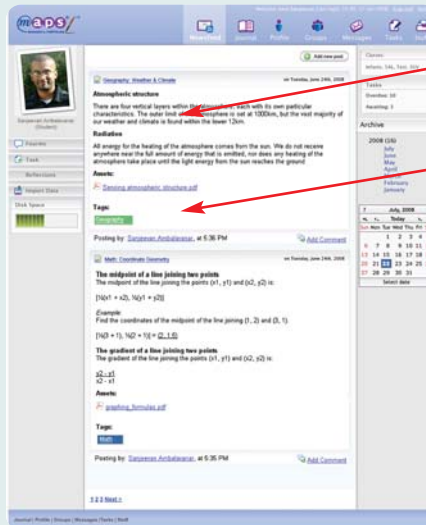

- Fully customisable – maximises **student engagement**
- Keep an **iterative record of their achievements** and key milestones in a project
- **Communicate with teachers and peers** for additional help and guidance as they work

- Utilise forums to develop and encourage **peer to peer collaboration**
- Use the innovative **Red Pen Tool to self-assess** coursework
- Link MAPS to **mobile devices** for evidence capture on **work placements or field trips**
- **Increase motivation and achievement** by making the assessment process more transparent
- A secure environment designed to **meet students' learning needs**.

Assessment Tools Showcase

Fully customisable interface, allows users to add applications and information that is relevant to their needs.

NEW!

Reflective Learner Diary - Students can keep a learning journal or 'blog' to reflect on their achievements.

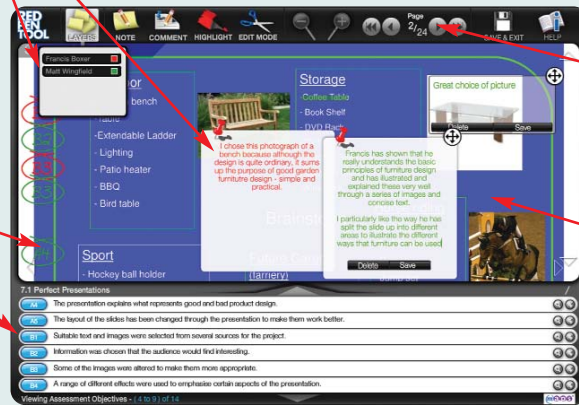

Photograph, video, sound and other files can be added to a journal entry to evidence their achievements. Journal entries can be referenced to any assessment task.

Supports Assessment for Learning.

NEW!

Red Pen On-Screen Annotation and Marking Tool – Students can self-assess their work, teachers can add annotations, highlight words, each in a different colour via an individual transparent layer that sits over the original work.

Assessment objectives/criteria are displayed directly below the work – drag and drop functionality to show where the criteria are evidenced in the work.

No need for large files to be downloaded before you can mark them - the Red Pen Tool streams the individual pages of the file page by page - even large PowerPoint presentations are streamed slide by slide.

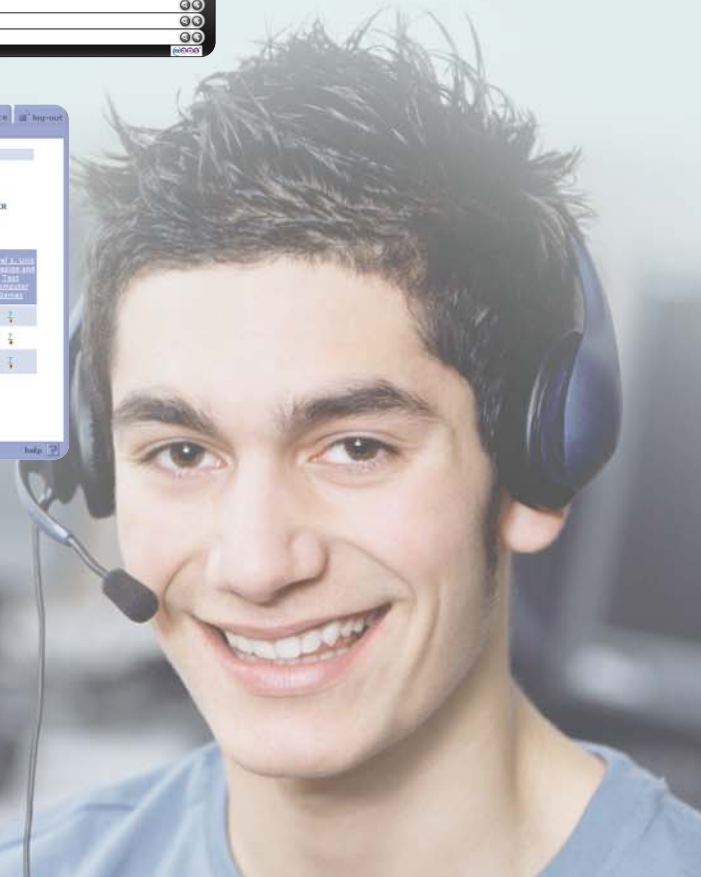

No need to have the application that created the original file – view all printable files through the Red Pen Tool.

MAPS models the structure and mark schemes for a range of qualifications, including Levels and Units.

Track students' progress through the qualification, with visual indications of the marks attained and stage of completion.

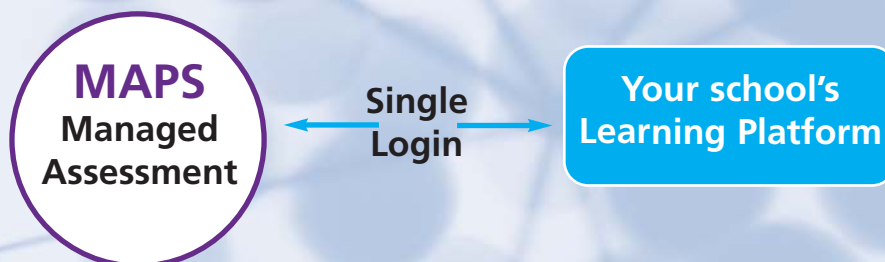

Simple and secure RSS Parent News Feed function to engage parents in the learning process.

Integration with Learning Platforms

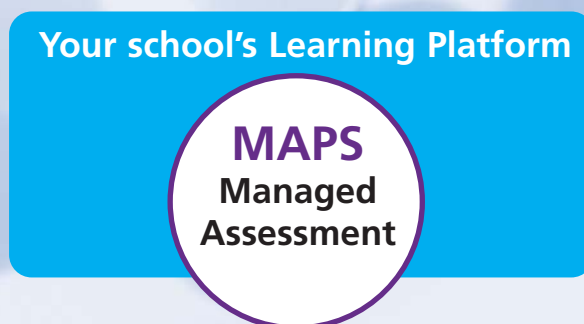

Single Sign-On:

MAPS 3.0 is fully Shibboleth and OpenID compliant, offering single sign-on compatibility with a range of school Learning Platforms, meaning teachers and students only need to login once

Full integration:

MAPS 3.0 is web-services based, meaning that MAPS assessment modules can be fully integrated into your Learning Platform providing a single learning and assessment environment

What you get:

- Fully managed, hosted and set up by TAG
- 200 MB of space for every user
- Customisable interface for every MAPS ePortfolio
- Centralised management and reporting on students' work and progress
- Assign tasks online, by individuals, groups or whole classes – includes mark schemas for all of the qualifications listed on page 2
- Revolutionary new Red Pen Tool to annotate, mark, and assess student work online.
- Brand new Reflective Learner Journal, enabling students to keep an iterative record of their achievements and key milestones in a project
- Ability to link MAPS portfolios to mobile devices to facilitate evidence capture when students are on work placement or field trips
- Simple and secure Parent Newsfeed function to engage parents in the learning process
- Import your own e-learning resources, including SCORM content and standard base quizzes
- Submit coursework online to directly to Examination Boards
